

● W1 hot dust (measured) 12 μm , no memory --- 12 μm , evolving dust
 ■ AllWISE 12 μm , 2010 — 12 μm , delayed ◇ MIRI 2028 $\pm 1\sigma$

12/24 separate hypotheses at $>3\sigma$ if host known (5/24 now)
 Means: lag $+0.06 \pm 0.01$ dex (5σ), evolution $+0.05 \pm 0.01$ (4σ)
 lag $+0.15$ dex if recent nuclear trends continue
